

The Daily Gazetteer.

TUESDAY, JUNE 3. 1740.

1740. 1546.

Yesterday arriv'd a Mail from Holland.

Berlin, June 4. N.S.

On the 31st ult. towards the Evening News came from Potsdam, that Frederick William, our Sovereign, and Elector of Brandenburg, died there that Day about 3 o'Clock in the Afternoon, aged 51 Years and 10 Months, wanting 4 Days, having been born the 4th of August 1688, in the 27th Year of his Reign, reckoning from 26th of February, 1713, when he came to the Crown. His late Majesty was marry'd on the 28th November, 1706, to the Princess Sophia-Dorothea, Daughter of the late King George I. and Sister of the present King George II. of Great Britain, now Queen Dowager, who was born on the 16th of March, 1687, by whom he has left 4 Princes and 6 Princesses. The Prince Royal Charles Frederick, eldest Son (born the 12th of January, 1712.) who at the same Time at Potsdam was immediately proclaimed King with the usual Ceremonies, and at 1 o'Clock in the Evening his Majesty came hither in Potsdam, from whence the Queen Dowager arrived some Hours after; but the Princess Royal, now Queen, did not come to Town till next Day. The King was gone a little before she came, to the Castle Charlottenbourg near this City, where 'tis thought will continue some Days, in order to make some necessary Regulations in the present Juncture; and several Changes are already talk'd of that are to be at Court.

Wexel, June 7. N.S. On the 4th Instant, at 3 o'Clock in the Morning, General Dessau, Governor of this City, received an Express from Berlin, with News of the King's Death, upon which the whole Garrison, consisting of his own and two other Regiments, was drawn out upon the Parade at Half an Hour after Four, when the General Count de Dohm-Burgrave, made a very Pathetic Discourse to them upon the Loss they had sustained by the Death of the King; which tho' it could not but justly comfort them, they had however this Comfort to find he succeeded in the Throne by the Prince Royal Son. He also exhorted the Garrison to discharge their Engagements to the new King with the utmost Fidelity and Strictness, and to merit by their Affection of a Prince whose Reign his Subjuncts may promise themselves will be most happy: After he made all the Regiments take the Oath of Allegiance to his Majesty. The Letters from Berlin say, that the Veldt-Marshal Prince of Anhalt-Dessau was at Potsdam the Day that the late King died.

Petersburg, May 20. N.S. The Knez Trubetzkoi Lieutenant General is advanced to the important Office of Procurator General of the Senate, which was formerly held by the Count Jagouziński; and M. Andrew Jacobitz is restor'd to his Office of Secretary of the Cabinet; but we know not what will be the Fate of M. Wolinski, late a Minister of the Cabinet, who is still confin'd close Prisoner at the Office of the Admiralty. The Frost has been so severe in these Parts, and of so long Continuance, that 'tis not four Weeks since a Seaman pass'd the Gulph of Finland upon the Ice from Helsingfort in the Province of that Name, as far as Revel in Livonia; but all the Rivers after having been frozen for 6 Months, are now entirely navigable. The Preparations of War are still continued, but we cannot yet penetrate into the true Design of them. On the 17th the Czarina with her whole Court quitted her Winter Palace, and went in Yachts to that where she commonly spends the Summer, upon which Occasion there was a general Discharge of the Guns from the Forts and the Admiralty. M. de l'Isle, Professor in our Academy of Sciences, has just publish'd *new Memoirs for the History and Progress of Astronomy, Geography, and Natural Philosophy*. The Professor Trube has also publish'd a Treatise in French, intitled, *A new Inquiry into the Origin and Foundation of the Law of Nature*.

Stockholm, May 25. N.S. The Count de St. Severin the French Ambassador has declar'd to the King in a private Audience, that his Master having nothing more at Heart than to maintain the Peace of Europe,

was very ready in his good Offices to prevent its being disturb'd in the North. That Minister has made the same Declaration to the Count de Gyllenbourg, and we are assur'd that he has wrote a Letter to the same Purpose to the French Ambassador at Petersburg. Our Court has taken off the Embargo which was laid upon the Merchant-ships in this Port. Letters from Constantinople affirm, that the Count de Bonneval contributed very much to the Conclusion of our late Treaty with the Porte.

Vienna, May 28. N.S. We are assur'd that the Veldt Marshal de Wallis declared lately, 'That he did not desire any Favour to be shewn him the Decision of his Affair: That he demanded to be examin'd before the Commissioners of the Aulic Council of War; and that he hop'd to justify himself entirely in all Matters laid to his Charge.

As the Bashaw of Bender was blamed for the ill Success of the last Campaign of the Turks towards the Niefter, People were surpriz'd that the Porte had not all this while shewn their Resentment against him; but it appears to have been only delayed; for Letters from Constantinople say, that about the End of March last the said Bashaw received Orders to repair thither to know the Grand Seignior's Pleasure, and that on his Arrival at Adrianople, he there found a Capigi Bashaw, who, after having reproach'd him for the Faults he committed last Campaign, shew'd him a Warrant by which he was condemn'd to lose his Head; and the Sentence was accordingly executed on the Spot, after which the Skin was stripp'd off of his Head, and being stuffed with Cotton, was sent to Constantinople to be set up in the Seraglio.

The Emperor in consideration of the faithful and useful Services of the Baron de Schmettau has not only made him Governor of Temeswaer, in the Room of General Suckau deceased, but has of his own accord sent him a full Power to settle the Limits of Servia and Sclavonia with the Turks, with Leave for his Excellency to choose a Substitute if he finds it necessary for that Affair. He has also appointed him First Commissioner for the Exchange of the Ambassadors of his Imperial Majesty and the Grand Seignior, and the Baron has already receiv'd a considerable Sum from the Imperial Chamber for that Purpose. His Imperial Majesty had assur'd this General by his Council of War, as well as by a gracious Letter which he wrote to him with his own Hand on the 25th of March last, that he was very well satisfy'd with his faithful Services, and that he would not fail to reward them the first Opportunity.

Naples, May 17. N.S. The Court not thinking fit that Lynch and Maclean, the two Irish Officers who murder'd Col. Odea, should any longer enjoy the Protection of the Sanctuary to which they retir'd, they were remov'd from thence on the 10th at Night, and committed Prisoners to the Castle del Ovo. The Duke de Charny, of the Orleans Family, Captain-General of the Troops of this Kingdom, and a Grandee of Spain, died here the 14th Instant, aged about 60, very much lamented by the King, the whole Court, and the General Officers.

Genoa, May 21. N.S. The Inhabitants of the Suburbs of Albenga, and of the neighbouring Country, pretending that they have been injured by the Burghers of that Town, have assembled in a tumultuous Manner to the Number of near 2000, and committed great Disorders. Tho' their Complaints seem just, and tho' the Government is well enough dispos'd to grant them Satisfaction, yet it will not hear them till they have laid down their Arms; and for this Purpose a Galley is sent into their Territory, with a Company of Soldiers, to force them.

Milan, May 23. N.S. All the Letters from Rome agree, that Cardinal Gotti, a Native of Bologna, will be elected Pope. They add moreover, that some of the Cardinals going to visit him in his Cell, and to congratulate him upon the great Number of Votes which have already been given in his Favour, he discovered a great deal of Humility upon this Occasion, by saying, *That he did not think himself worthy to wear the Triple Crown; and that he hop'd the Holy Ghost would inspire the Cardinals in Favour of a Subject more capable than him to fill the Pontifical Throne*.

Rome, May 22. N.S. Cardinal Gotti's Party is become so considerable in the Conclave, that he has already had 33 Votes in his Favour, a Majority from

whence 'tis generally believed that he will be cho's Pope; which 'tis not doubted will be very much to the Satisfaction of the Courts of France and Spain. Nor does the Court of Vienna seem to oppose him. But as it is necessary to have a positive Declaration how that Court stands affect'd to him, the Cardinal del Giudice, Protector of Germany, has upon this Occasion dispatch'd a Courier to Vienna, whose Return is expected with Impatience. Cardinal Gotti is very well versed in Theological Matters, and has compos'd several Tracts upon the Doctrine of St. Thomas, the Propositions of Jansenius, and the Moral Reflections of Father Quésnel; Moreover he is of a mild Temper, and well qualified to determine Controversies about Church-Affairs. The other Cardinals are already preparing to leave the Conclave; and several of them have actually sent home Part of their Plate and other Utensils which they had in their Cells, it being every Day expected that a Pope will be cho's.

Frankfort, June 5. N.S. The Prince of Orange, who is at Dillenburg, has received the Homage of his Subjects of that Principality. Letters from Vienna say, that the Imperial and French Courts are concerting the necessary Measures to facilitate the Election of a King of the Romans.

Augsburg, May 30. N.S. Provisions and Forage are very scarce in these Parts; and for some Time past there have been Prayers in all our Churches for fair Weather.

BY a noble Chymical Preparation.

Most excellent Medicine for this Purpose that ever known, far exceeding all things ever yet published. Its Use, its Virtues are beyond Expression, and can truly known but by Experience: Words come short of its just Praise.

It is a certain, and, as it were, an instant Cure for Thickens of Hearing, Noise or Pain in the Ears, from Cause soever, or of ever so long standing, having cured Numbers of Persons of both Sexes, and all Ages, that were in a manner totally deaf, after all other Means and Medicines external and internal, by Advice, and also by Publick have failed, with the greatest Ease and Safety, and to utmost Satisfaction and Wonder; for,

In a peculiar Manner it strengthens, softens, and opens the Drum of the Ear, which by being cried, or often the first, and chief Cause of every Complaint of Hearing, or of Noise or Pain in the Ears, &c. To which, this noble Medicine is a true Specifick, that perfectly to cure all possibly curable Cases, after all Means and Medicine have utterly failed; which is not to be said of any other Thing in the whole World of itself: Any Cold in the Head, or any Hurt by Matter in the Ears, it instantly cures.
